

Model No. : ST-USB232

USB to DB9 RS232 Serial Adapter

FEATURES AND SPECIFICATIONS

Product Description

This cable converts USB signals to RS-232 serial signals, allowing serial devices such as modems and PLC systems to work in a USB environment..

Today most of the new notebook computer don't equipped with RS-232 serial port, so this device could help you to solve the problem to connect your PLC to notebook computer. Easy to run the applications like data acquisition, PLC monitoring and instrument control. We have tested this device in AB, Mitsubishi, Omron, and Moog PLC , 100% run in MS Windows environment monitor and programming mode.
